

Vayyar Home monitors the environment 24/7 to detect falls and provide rich data on resident activity in your community.

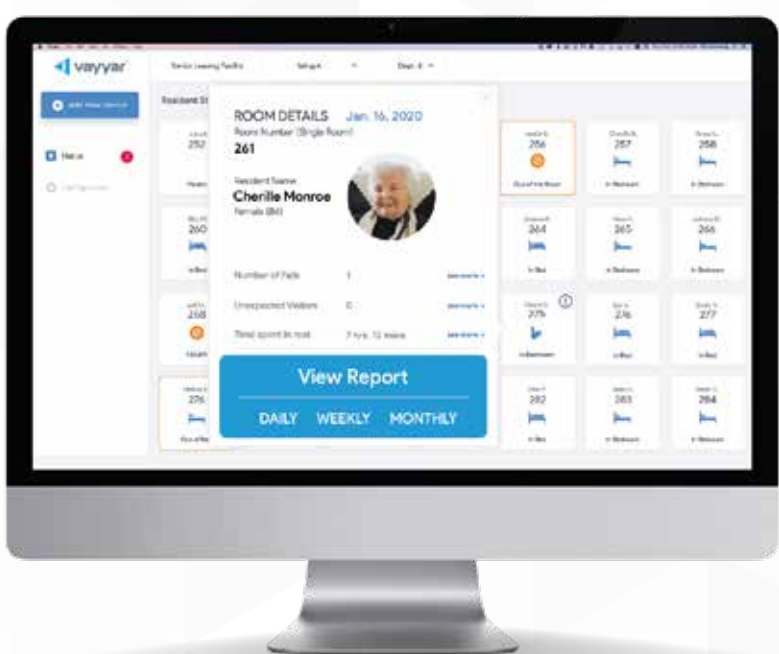

The 2-Step Set Up Process.

Mount the device on the wall or ceiling and connect to Wi-Fi for 24/7 monitoring.

Vayyar’s monitoring dashboard shows the status of your residents at a glance.*

*Analytics and behavior data shown for example purposes

If a fall happens, it will send mobile alerts to your staff.

*Integration options with Nurse Call Systems available

Increase staff accountability and efficiency.

Enable your staff to provide better care to your residents by giving them actionable real-time and trending data, allowing you to optimize your operations.

Help your staff make better use of their time.

Vayyar Home provides you with data that can reduce the need for routine room visits and enhance staff utilization.

How we help.

Installation training and support for partners

Can be integrated to existing Nurse Call / EMR systems

Keeps your residents safe and protects privacy as it doesn't use cameras
